

Avichay Iny

Student of Computer Science

Computer Science student at Bar-Ilan University with motivation and ambition for software development and problem-solving. Fast learner, quick to adapt new skills on the go, with excellent interpersonal skills and a great team player. Responsible, organized, and efficient under pressure, with great problem-solving and analytical skills.

Education

Mars 2023 – July 2026(1 semesters left) | B.Sc. Computer Science, Bar-Ilan University

Key courses

Communication Networks: 97 | Advanced system programming: 98 | Introduction to CS: 95 | Operation system: 94 | Object-Oriented Programming: 91 Introduction to ML: 90.

2014-2017 | High school studies

Completed Matriculation Certificate (average of 114).
Major- 10 computer science units: 100 | 5 math units: 98.

Projects

Spring 2024 | Advanced system programming course

Developed a full-stack YouTube-style video platform featuring a React web client and a Java/Android mobile app (MVVM). Built a Node.js/Express backend (MVC) with MongoDB and a RESTful API. Integrated a multithreaded C++ server, using Room and Retrofit, with Git/Jira for collaboration.

Spring 2025 | Machine learning course

A Built and trained various machine learning models from scratch in Python to perform predictive analysis and data clustering, demonstrating strong foundational knowledge in core ML concepts.

Winter 2026 | Artificial Intelligence course

Developed a Python AI controller for a multi-agent simulation, solving increasingly complex environments in three stages: (1) Heuristic search (A*, GBFS) for deterministic planning; (2) MDP modeling for stochastic actions; and (3) Reinforcement Learning (ADP) to dynamically optimize strategies in unknown environments.

Self Project | WhatsApp Bot for Google Calendar Management

Engineered a WhatsApp chatbot (Python/Flask) managing Google Calendar events, using the Gemini LLM API for natural language processing. Containerized with Docker and deployed to Google Cloud Run via CI/CD. Integrated Meta/Calendar APIs, OAuth 2.0, and Cloud SQL (PostgreSQL).

Work Experience

2023 – Present | High School

Provided math and CS tutoring for high-school students, focusing on Bagrut exam preparation.

Technical Skills

- Programming Languages: C, C++ (OOP), C#, Python, Java, JavaScript
- Tech & Frameworks: LLM API, CSS, React, Node.js, Flask, Unicorn, MySQL, MongoDB, PostgreSQL, RESTful API, Google Cloud Platform (GCP), WhatsApp Business API, Google Calendar API, Google OAuth 2.0, HTML, TCP/IP, NeonDB.
- Tools: VS Code, Cursor, Copilot, Android Studio, Clion, GitHub, Jira, Docker, Virtual machine, Wsl, Containers, WireShark
- Operating Systems: Linux, Windows
- ML Tools: NumPy, PyTorch, sklearn, pandas.

Languages

Hebrew - Native

English – Fluent

Military Service

2019-2022 | Combat Soldier in the Armored Corps

Tank Crew Member
